

SPRINT 3 Retrospective

During sprint 3 retrospective, some ideas have been discussed and at the end they have been written down as the following:

What we should start doing:

- Plan a meeting with other teams opened for a discussion about their overall activity in order to learn from one another;

What we should keep doing:

- Take care of our health condition, as it may be a possible risk of delaying the work;

What we should stop doing:

- Losing focus of which are our priorities.
