SPRINT 3 Review

The SCRUM team presented to the Product Owner a functional piece of the product, represented by booking a flight.

As the Product Owner acknowledged that the overall goal of the sprint was met, the items at IDs 5 and 6 have been marked as done in the product backlog. Also, items at ID 13 and 14 and 17 have been finished. Moreover, the Product Owner decided to change the priority of items from "Critical" at IDs 10 and 11 to "Medium" at IDs 17 and respectively 18.
