SPRINT 2 Review

The SCRUM team presented to the Product Owner a functional piece of the product, represented by finding airports, airplanes, crew members and flights in the system.

As the Product Owner acknowledged that the overall goal of the sprint was met, the items at ID 4 and 12 have been marked as done in the product backlog. Moreover, the Product Owner changed the priority of creating the booking a ticket functionality from "Critical" at IDs 8 and 9 to "Critical" at IDs 5 and 6.
