SPRINT 5 Review

The SCRUM team presented to the Product Owner a functional piece of the product, represented by editing airports, airplanes, crew members and passengers in the system.

As the Product Owner acknowledged that the overall goal of the sprint was met, the item at ID 9 has been marked as done in the product backlog. Also, items corresponding to finishing the project and process report (IDs 1 and 2) have been completed. The team reflected on the unimplemented items from the product backlog.
